INTERESTS

- ▸ Coding & Technology
- ▸ Innovation
- ▸ Photography & Video
- ▸ Gym & Fitness
- ▸ Football

PROFESSIONAL SUMMARY

Driven Computer Science student with hands-on experience building full-stack web apps, ERP systems, and business software. Skilled in React, Next.js 14, TypeScript, and Tailwind CSS, with real-world projects including live client websites, custom Odoo modules, and a full enterprise ERP. Leverages AI-powered tools like Claude Code, Cursor, and Framer to deliver high-quality solutions faster. Committed to building practical technology for businesses in Ethiopia and beyond.

EDUCATION

Bachelor of Science in Computer Science

Microlink Information Technology College | Addis Ababa, Ethiopia

Focused on software development, artificial intelligence, and data-driven applications.

2021 – Present

PROJECTS

Coffee Shop Website

Designed and developed a responsive website for Darik Coffee — a local Ethiopian coffee shop. Features include an interactive menu, brand storytelling section, image gallery, and mobile-first layout. Built using modern web frameworks with a focus on visual identity and user experience.

🌐 **Live Site:** darikcoffee.com

Photography Studio Website

Developed a professional portfolio website for Girma Moges Pictures, a photography studio. Features a curated photo gallery, service listings, about section, and contact/booking form. Designed for visual impact with smooth navigation and a clean, elegant layout.

🌐 **Live Site:** girmamogespictures.com

Digital Marketing Agency Website

Built a dynamic landing page for a digital marketing agency featuring animated sections, client portfolio showcase, services overview, and a contact form. Designed with Framer-inspired animations and a modern aesthetic to reflect the agency's brand.

🌐 **Live Site:** tamaddiss.vercel.app

Odoo Custom Module

Built 5 production-grade Odoo modules in Python across HR, Accounting, Services, and Education domains:

- ▸ **budget_plan** — Budget & Sales Plan management with multi-level approval workflow and detailed purchase/sales items.
- ▸ **overdraft_interest_calculator** — Comprehensive loan management covering overdraft, term loans, merchandise & pre-shipment loans with a unified KPI dashboard.
- ▸ **timesheet_workforce** — Tracks daily hours for employees & contractors, calculates payments, and links consumption back to Budget Plan.
- ▸ **question_bank** — Question validation & distribution with Instructor→Reviewer approval, Excel export, and reporting.
- ▸ **trainer** — Internal Odoo training quiz module for employee skill assessment.

ERP System

Built a full-featured ERP system using Next.js 14 App Router, TypeScript, Tailwind CSS, shadcn/ui, React Hook Form, Zod, TanStack Query, Prisma, and NextAuth v5. Covers HR management, inventory tracking, finance, and sales reporting with role-based authentication and a clean dashboard UI.
